ABDULLAH ALJOUJOU

FRONT END DEVELOPER | REACT , FLUTTER

PROFILE

Experienced Flutter and React developer with 3 years of experience in building scalable applications. Proficient in state management using BLoC and GetX. Familiar with clean code, SOLID principles, and MVC design patterns. Extensive experience in API handling with HTTP, Dio, and responsive app design. Skilled in Agile/Scrum methodologies. Dedicated to writing maintainable code and delivering high-quality applications.

Birthday: 4 April 2000

EDUCATION

Information Technology Engineer at Damascus university   09-2020 \ present

PROFESSIONAL EXPERIENCE

Building in Real projects

React Developer at National Islamic Bank   02-2024 \ present

NIB Online Account Opening Platform: A secure and efficient platform enabling customers to open bank accounts online, whether traditional or digital. Integrated with the bank's KYC system and core banking platform, ensuring a smooth and safe process for users. The platform successfully passed penetration testing and is built to support high levels of security and scalability.

- Security Testing: The platform underwent a penetration test, which I successfully passed as part of the development team, ensuring the security and integrity of the online services

- Middleware Development: Developed a middleware solution to facilitate secure communication between the KYC system and the core banking system.

- Linux Server Operations: Worked on Linux servers, enhancing system management and troubleshooting skills.

- Remote Code Management: Leveraged remote connections to access the bank's code base and deploy updates, collaborating with the team through Linux servers.

- gile Scrum Teamwork: Worked collaboratively in an Agile Scrum environment, participating in daily standups, sprint planning, and retrospectives to ensure efficient teamwork and project delivery.

Lead Application Developer at Wasena Company (Flutter)   11-2023 \ present

Wasena Delivery App: A reliable delivery service for the Damascus countryside, offering fast and easy package ordering, tracking, and delivery. Available on **iOS** and **Android** for both residents and businesses.

- Leadership Role: Led the development of the Wasena delivery application, overseeing both backend and frontend aspects to ensure seamless communication between the web and app platforms.

- Efficient Service Delivery: Spearheaded the project to provide efficient delivery solutions to residents and businesses in the Damascus countryside, enhancing user experience and satisfaction.

- State-of-the-Art Technologies: Utilized cutting-edge technologies such as Flutter for the frontend, GetX for state management, and Laravel for backend development, showcasing proficiency in modern tech stacks.

- User-Centric Design: Focused on developing a user-friendly interface for Wasena, enhancing the ordering process and overall user experience, demonstrating a commitment to customer satisfaction and usability.
