PROFILE

I am a **Flutter developer with 3 years of experience**, possessing strong analytical and troubleshooting skills. I am proficient in state management using **BLoC**, **Provider**, and **GetX** and **Riverpod**. I also have extensive knowledge of clean code principles, SOLID principles, and design patterns such as **MVC** and **MVVM**. I am committed to writing **Clean Code** and following coding conventions to deliver high-quality applications, I have experience in API handling using **HTTP** and **Dio**, multi-language app design, responsive app design for all screen sizes, and familiarity with GitHub for version control.

PROFESSIONAL EXPERIENCE

Building Flutter projects

Create Android Mobile Apps<link source code and projects at the end>

- Project 1 : <Pioneer Clinic>An application was made for the pioneers consultants clinic in Syria.
  This App make healthcare easier and more accessible. Pioneer Clinic is a leading healthcare destination in Syria ,combining modern technology with high-quality medical services.
  App Features: https://mostaql.com/u/AbdullahElHasan/portfolio/1701269-pioneer-clinic-app

- Project 2: <Consultation App> In this project, I've leveraged the power of Flutter to create a user-friendly and dynamic interface for a consultation app.
  more details: https://mostaql.com/portfolio/1701258-consultation-app

- Project 3 :<PionnerNetwork>Simple community project management application for programmers and developers that works like Freedcamp platform in which all data from the API (Online application).

- Project 4:<WeatherApp> contains two interfaces, it displays the weather for only five days, giving all the details for each day(Online Application).
