PROFILE

Information Technology Engineer (AI specialization, Damascus University, 2026) with 4 years of hands-on experience shipping mobile and web products. I build complete systems: Flutter and React front ends, Laravel/PHP back ends and REST APIs, with AI features on top. Delivered a bank-grade onboarding platform that passed penetration testing, a mobile banking app, and apps live on Google Play and the App Store. Graduation project: a voice-controlled assistive app for blind users using computer vision and OCR. Open to remote work.

TECHNICAL SKILLS

Mobile	Flutter, Dart, BLoC/Cubit, GetX, Riverpod, GoRouter, Dio, Firebase (FCM)
Web & Backend	React, JavaScript ES6+, Redux / Context API, HTML/CSS, Laravel, PHP, REST APIs, MySQL, MongoDB
AI	Python, Computer Vision (YOLOv8, OpenCV), OCR (EasyOCR), NLP (transformers, NLTK, spaCy), LLM API integration (Gemini), FastAPI
Tools & Practice	Git/GitHub, Linux servers, Postman, Figma, Clean Code, SOLID, MVC, design patterns, Agile/Scrum

PROFESSIONAL EXPERIENCE

React & Flutter Developer — National Islamic Bank

02/2024 – present

Damascus, Syria

- **Online Account Opening Platform (React):** secure web platform for opening traditional or digital accounts, integrated with the bank's KYC system and core banking platform. Passed penetration testing as part of the development team.
- **Middleware:** built the service that secures communication between the KYC system and core banking.
- **Watani One (Flutter mobile banking app):** account balances and statements, local and international transfers, dynamic bill payments, card controls, QR sharing, Arabic/English, PDF receipts. Riverpod, Dio, GoRouter; biometric login, encrypted session storage, certificate pinning and inactivity-based session expiry.
- Worked on Linux servers, deployed updates remotely, and delivered in an Agile Scrum team (stand-ups, sprint planning, retrospectives).

Lead Application Developer — Wasena Company

11/2023 – present

Damascus countryside delivery service

- Led development of the Wasena delivery app (Flutter, GetX) and its Laravel back end, covering ordering, tracking and delivery for residents and businesses.
- Published on both **Google Play** and the **App Store**; owned both front end and back end so the app and web platform communicate seamlessly.

Flutter Developer (Contract) — Al-Majara Al-Fidiya Company (KarajIraq)

05/2024 – 02/2025

Iraq · remote

- Built the Flutter front end of a ride-hailing system: passenger app, driver app and admin dashboard, with live route tracking, real-time notifications and secure payments (Visa, credit cards, Apple Pay).

Mobile Application Developer — Pioneers Network

06/2022 – 12/2022

Saudi Arabia · remote

- Designed and built responsive Flutter apps for iOS and Android, including the QuizOn app (published on Google Play), and contributed to project plans and timelines.

SELECTED PROJECTS

- **Smart Voice-Controlled App for Blind and Visually Impaired People** (graduation project, team of 4, 2026) — Flutter app + FastAPI server over WebSocket with three modes: obstacle detection (YOLOv8 with distance estimation and silence rules), Syrian currency recognition (YOLOv8-OBB, refuses to announce below 70% confidence) and medicine reading (OCR + fuzzy matching, Gemini fallback only for the name). Model quantized from 22.5 MB to 11.5 MB. *My role: [add your role].*
- **DiyGuid** (App Store) — AI-powered home-repair assistant: the user photographs a broken item, the app identifies the problem, required tools and repair steps. Flutter + Laravel.
- **Sedra Fatima** — hall and chalet booking website (React + PHP) for the Saudi market.
- **Intelligent Language Assistant** — Python desktop app helping children learn English: question generation (T5, WordNet), BERT-embedding answer similarity and pronunciation scoring.

EDUCATION

B.Eng. Information Technology Engineering — Artificial Intelligence, Damascus University 2020 – 2026

LANGUAGES

Arabic (native) · English (intermediate, technical reading and writing)
